PetPal API

Overview

Documentation for PetPal REST API

Version information

Version : v1

URI scheme

Host : 127.0.0.1:8000
BasePath : /
Schemes : HTTP

Consumes

- `application/json`

Produces

- `application/json`

Security

Basic

Type : basic

Paths

POST /accounts/seeker/

Description

Create new pet seeker based on the given information. The required fields includes: username, password, and email Errors include: 1. Username: A user with that username already exists. 2. Email: Enter a valid email address. 3. All: This field may not be blank. A 400 Bad request would be returned. Authentication is not required for the sign up.

Parameters

Type	Name	Schema
Body	**data** *required*	PetSeeker

Responses

HTTP Code	Schema
201	PetSeeker

Tags

- accounts

GET /accounts/seeker/{id}/

Description

Pet seeker profile with given ID will be retrieved. User must either be pet seeker himself or pet shelter account that has a pending application with the intended pet seeker.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer

Responses

HTTP Code	Schema
200	PetSeeker

Tags

- accounts

PUT /accounts/seeker/{id}/

Description

Update seeker profile info with given ID based on the given info User is required to be logged in as the current pet seeker account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer
Body	**data** *required*		PetSeeker

Responses

HTTP Code	Schema
200	PetSeeker

Tags

- accounts

DELETE /accounts/seeker/{id}/

Description

Delete pet seeker with the given ID. User are required to be logged in as the current pet seeker account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- accounts

PATCH /accounts/seeker/{id}/

Description

Partial update seeker profile info with given ID based on the given info of pet seeker. User is

required to be logged in as the current pet seeker account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer
Body	**data** *required*		PetSeeker

Responses

HTTP Code	Schema
200	PetSeeker

Tags

- accounts

POST /accounts/shelter/

Description

Create new pet shelter based on the given information. The required fields includes: username, password, and email Errors include: 1. Username: A user with that username already exists. 2. Email: Enter a valid email address. 3. All: This field may not be blank. A 400 Bad request would be returned. Authentication is not required for the sign up.

Parameters

Type	Name	Schema
Body	**data** *required*	PetShelter

Responses

HTTP Code	Schema
201	PetShelter

Tags

- accounts

GET /accounts/shelter/

Description

Get a list of all shelter profiles with the pet shelter information. Authentication is not required.

Parameters

Type	Name	Description	Schema
Query	**page** *optional*	Page number	integer
Query	**size** *optional*	Page size	integer

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< PetShelter > array

Tags

- accounts

GET /accounts/shelter/{id}/

Description

Pet shelter profile with given ID will be retrieved. Authentication is not required.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer

Responses

HTTP Code	Schema
200	PetShelter

Tags

- accounts

PUT /accounts/shelter/{id}/

Description

Update shelter profile info with given ID based on the given info User is required to be logged in as the current pet shelter account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer
Body	**data** *required*		PetShelter

Responses

HTTP Code	Schema
200	PetShelter

Tags

- accounts

DELETE /accounts/shelter/{id}/

Description

Delete pet shelter with the given ID. User are required to be logged in as the current pet shelter account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- accounts

PATCH /accounts/shelter/{id}/

Description

Partial update shelter profile info with given ID based on the given info of pet shelter. User is required to be logged in as the current pet shelter account.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer
Body	**data** *required*		PetShelter

Responses

HTTP Code	Schema
200	PetShelter

Tags

- accounts

POST /accounts/token/

Description

Login the user with the given username and password credentials. 400 Bad request will be

returned if 1). User Does Not Exist. 2). The password does not match with the username.

A JWT corresponding to the logged-in user would be returned if authentication succeeds.

Parameters

Type	Name	Schema
Body	**data** *required*	CustomizedTokenObtain

Responses

HTTP Code	Schema
201	CustomizedTokenObtain

Tags

- accounts

POST /accounts/token/refresh/

Description

Takes a refresh type JSON web token and returns an access type JSON web token if the refresh token is valid.

Parameters

Type	Name	Schema
Body	**data** *required*	TokenRefresh

Responses

HTTP Code	Schema
201	TokenRefresh

Tags

- accounts

POST /applications/

Description

Creates application based on the given details about the application. User can only create application for a pet listing that is "available". User is required to be logged in as a pet seeker.

Parameters

Type	Name	Schema
Body	**data** *required*	CreateApplication

Responses

HTTP Code	Schema
201	CreateApplication

Tags

- applications

GET /applications/

Description

If user is logged in as pet shelter, it will return a list of applications sent to the pet that user owns. If user is logged in as pet seeker, it will return all the applications that pet seeker sent. User are required to be logged in. You can provide query parameters to filter applications by status and sort by creation time or last update time. If no query parameter is provided it will not apply any filter.

Parameters

Type	Name	Description	Schema
Query	**order_by** *required*	Options for sorting. Negative sign (-) indicates descending order.	enum (created_at, -created_at, last_updated, -last_updated)
Query	**page** *optional*	Page number	integer
Query	**size** *optional*	Page size	integer
Query	**status** *optional*	Status to be filtered.	enum (accepted, denied, pending, withdrawn)

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< CreateApplication > array

Tags

- applications

GET /applications/{id}/

Description

Retrieves application with the given ID. User is required to be logged in either as pet seeker or pet shelter. Pet seeker can only retrieve application that they sent and pet shelter can only retrieve application that they received.

Parameters

Type	Name	Schema
Path	**id** *required*	string

Responses

HTTP Code	Schema
200	UpdateApplication

Tags

- applications

PUT /applications/{id}/

Description

Updates application with the given ID. User is required to be logged in either as pet seeker or pet shelter. - Shelter can only update the status of an application from pending to accepted or denied. - Pet seeker can only update the status of an application from pending or accepted to withdrawn.

Pet seeker can only update application that they sent and pet shelter can only update application that they received.

Note: there are no difference between put and patch because we only have 1 required field.

Parameters

Type	Name	Schema
Path	**id** *required*	string
Body	**data** *required*	UpdateApplication

Responses

HTTP Code	Schema
200	UpdateApplication

Tags

- applications

PATCH /applications/{id}/

Description

Do partial update on the application with the given ID. User is required to be logged in either as pet seeker or pet shelter. - Shelter can only update the status of an application from pending to accepted or denied. - Pet seeker can only update the status of an application from pending or accepted to withdrawn.

Pet seeker can only update application that they sent and pet shelter can only update application that they received.

Note: there are no difference between put and patch because we only have 1 required field.

Parameters

Type	Name	Schema
Path	**id** *required*	string
Body	**data** *required*	UpdateApplication

Responses

HTTP Code	Schema
200	UpdateApplication

Tags

- applications

POST /comments/application/

Description

Create comment on an Application. Ensures that the User who wishes to comment is part of the Application, whether that be a Seeker or Shelter of the Application. Verifies that comment replies cannot be directed across models (e.g. Cannot reply to Application when on PetShelter, Cannot reply to Application from a different Application).

Parameters

Type	Name	Schema
Body	**data** *required*	Comment

Responses

HTTP Code	Schema
201	Comment

Tags

- comments

GET /comments/application/

Description

Returns paginated list of comments for an Application given the object_id (primary key) of the Application. Orders by creation date.

Parameters

Type	Name	Description	Schema
Query	**page** *optional*	Page number	integer
Query	**size** *optional*	Page size	integer

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< Comment > array

Tags

- comments

POST /comments/rating/

Description

Create rating for a PetShelter from a User.

Parameters

Type	Name	Schema
Body	**data** *required*	Rating

Responses

HTTP Code	Schema
201	Rating

Tags

- comments

GET /comments/rating/

Description

Returns all the ratings for a given shelter.

Parameters

Type	Name	Description	Schema
Query	**page** *optional*	Page number	integer
Query	**size** *optional*	Page size	integer

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< Rating > array

POST /comments/shelter/

Parameters

Type	Name	Schema
Body	**data** *required*	Comment

Responses

HTTP Code	Schema
201	Comment

Tags

* comments

GET /comments/shelter/

Description

Returns paginated list of comments for a PetShelter given the object_id (primary key) of the PetShelter. Orders by creation date.

Parameters

Type	Name	Description	Schema
Query	**page** *optional*	Page number	integer
Query	**size** *optional*	Page size	integer

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< Comment > array

Tags

- comments

GET /comments/{id}/

Description

Retrieves a single comment given the primary key in URL.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this comment.	integer

Responses

HTTP Code	Schema
200	Comment

Tags

- comments

POST /notifications/

Description

Create a new notification based on the provided data. The notification type and user association are determined by the type of user and the type of content object involved. - If the user is a PetSeeker and the content type represents an Application, it creates a status update notification. - If the user is a PetShelter and the content type represents an Application, it creates an application creation notification. - If the user is a PetShelter and the content type represents a Comment, and the

comment is made on Shelter, it creates a new review notification. - If the content type represents a Comment and comment was made on an Application, it creates a new message notification. - If the content type represents a Pet, it creates a new pet listing notification.

Parameters

Type	Name	Schema
Body	**data** *required*	Notification

Responses

HTTP Code	Schema
201	Notification

Tags

- notifications

GET /notifications/

Description

Retrieve a list of notifications for the authenticated user with filtering. - Users (shelter and seeker) can only view their own notifications. - User can filter notifications by read/unread to get all unread notifications. - It is sorted by creation time in descending order (latest first).

Parameters

Type	Name	Description	Schema
Query	**page** *optional*	Page number	integer
Query	**read** *optional*	Read attribute used to filter.	boolean
Query	**size** *optional*	Page size	integer

Responses

HTTP Code	Schema
200	Response 200

Response 200

Name	Description	Schema
count *optional*	Total number of items returned.	integer
next *optional*	Link for next page.	string (uri)
previous *optional*	Link for previous page.	string (uri)
results *required*		< Notification > array

Tags

• notifications

GET /notifications/{id}/

Description

Retrieve details of a user's notification and provide links to associated models. - If the notification refers to a comment, link to the new comment added. - If the notification refers to an application, link to application creation and status update. - If the application refers to a pet, link to a new pet listing. It also updates the state of a notification from "unread" to "read".

Parameters

Type	Name	Schema
Path	**id** *required*	string

Responses

HTTP Code	Schema
200	Notification

Tags

• notifications

DELETE /notifications/{id}/

Description

Delete the notification with the given id. The notification has to be associated with the user.

Parameters

Type	Name	Schema
Path	**id** *required*	string

Responses

HTTP Code	Schema
204	No Content

Tags

- notifications

POST /pets/

Description

Create new pet based on the given details of the pet. User are required to be logged in as pet shelter.

Parameters

Type	Name	Schema
Body	**data** *required*	Pet

Responses

HTTP Code	Schema
201	Pet

Tags

- pets

GET /pets/

Description

Searches pets based on various filters and sorting options. Authentication is not required. 400 Bad Request will be returned when filter options for the query parameters are invalid. When filter options are not given, it will return all pets.

Parameters

Type	Name	Description	Schema
Query	**adoption_fee** *optional*	Fee associated with adopting the pet.	string (decimal)
Query	**adoption_fee***gt* optional__	Upper bound (exclusive) of adoption_fee for filtering.	string (decimal)
Query	**adoption_fee***gte* optional__	Upper bound (inclusive) of adoption_fee for filtering.	string (decimal)
Query	**adoption_fee***lt* optional__	Lower bound (exclusive) of adoption_fee for filtering.	string (decimal)
Query	**adoption_fee***lte* optional__	Lower bound (inclusive) of adoption_fee for filtering.	string (decimal)
Query	**age** *optional*	Age of the pet.	number
Query	**age***gt* optional__	Upper bound (exclusive) of age for filtering.	number
Query	**age***gte* optional__	Upper bound (inclusive) of age for filtering.	number
Query	**age***lt* optional__	Lower bound (exclusive) of age for filtering.	number
Query	**age***lte* optional__	Lower bound (inclusive) of age for filtering.	number
Query	**breed** *optional*	Id of the Breed model, representing the breed of the pet (e.g. American Bobtail).	integer
Query	**color** *optional*	Color of the pet. null represents unknown/others.	enum (brown, gray, white, black, orange)
Query	**order_by** *optional*	Options for sorting. Negative sign (-) indicates descending order.	enum (name, -name, age, -age, weight, -weightadoption_fee, -adoption_fee)
Query	**owner** *optional*	Pet shelter that owns the pet.	string
Query	**page** *optional*	Page number	integer
Query	**pet_type** *optional*	Id of the PetType model, representing the type (or category) of the pet such as dog, cat, birds, etc. null represents unknown/others.	integer

Type	Name	Description	Schema
Query	**sex** *optional*	Sex of the pet. null represents unknown/others.	enum (male, female)
Query	**size** *optional*	Page size	integer
Query	**status** *optional*	Pet adoption status.	enum (withdrawn, pending, adopted, available)
Query	**weight** *optional*	Weight of the pet.	number
Query	**weight***gt* optional__	Upper bound (exclusive) of weight for filtering.	number
Query	**weight***gte* optional__	Upper bound (inclusive) of weight for filtering.	number
Query	**weight***lt* optional__	Lower bound (exclusive) of weight for filtering.	number
Query	**weight***lte* optional__	Lower bound (inclusive) of weight for filtering.	number
